Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/12/06 has been entered.

Claim Objections

2. Claims 1 and 8 are objected to because of the following informalities: There is an inconsistency in terminology used in claims 1 and 8, and that of the specification. In the specification the term "distal" is used to refer to a location next to or toward the substrate to which the fixture is attached. The instant claims however use the term "distal" to refer to locations away from the substrate. See claim 1, lines 3-4 for example. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5-10 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hutter ('151). The reference discloses a fastener 71 fixture and substrate 84 combination; see Figures 19 and 22. The fixture comprises a support member including a securing means 82, a central bore, an inner retainer 75 for holding the fastener movably between a first position and a second position, and a biasing means. The inner retainer and support members contain grooves or threads, i.e. beveled locking edges, that may be considered stops. In particular, Figures 21, 22 show that the cylinder 75 has upper threads which do not engage the support member when the cylinder is in a first position (Figure 21) but do engage the support member when the cylinder is in a second position (Figure 22). The top thread of the cylinder in Figure 22 may be considered a stop that engages the proximal extremity of the support member. Concerning claim 3, since the various parts of the adhesive attachment in the reference are connected together they are considered to be of one-piece construction. Also, before the cylinder is placed in the support member, it is a two piece construction (claim 5).

Allowable Subject Matter

5. Claims 4 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
